

Education Data Resources List

Updated October 2014

Note this list is not exhaustive. For questions and comments contact:
Terrence Willett, Planning and Research Director, at terrence@cabrillo.edu.

California Community Colleges Chancellor's Office Data Mart: Enrollments, demographics, success and retention rates, basic skills progression, transfers, graduates, scorecard data, special populations, and more for Cabrillo and other colleges. This is the best first stop for data as it is automatically updated and contains our official data that are readily verifiable by the public.

<http://datamart.cccco.edu/DataMart.aspx>

Cabrillo College Fact Book: Historically the fact book served the function of the data mart. With automated reporting now providing a higher level of service, the fact book is being refined to contain basic enrollment data that matches the data mart and additional data items not available from the data mart such as placement rates, library circulation, and summary budget information.

<http://www.cabrillo.edu/services/pro/factbook/>

Student Outcomes for Faculty Inquiry and Analysis (SOFIA): This cutting edge business intelligence tool funded by our Title V grant is based upon the same core data set as the data mart but provides section level detail of enrollments, success, and completion. In addition, student progress and retention through key milestones can be tracked. Most significantly, SOFIA can provide outcome data on special cohorts of students who participate in services and programs including custom user defined cohorts. These reports contain sensitive data and are only available to authorized users from on campus computers in the staff domain.

For training, contact: Terra Morris, temorris@cabrillo.edu .

[sofia/](#) (from campus computers only)

Custom SQL Reports: Our SQL data warehouse that powers SOFIA also provides great flexibility in providing customized reports to support operational needs. Examples include contact information for students on wait lists, lists of majors/concentrators in a department, students participating in probation workshops, and more. These reports contain sensitive data and are only available to authorized users from on campus computers in the staff domain.

For access information, contact: Terrence Willett, terrence@cabrillo.edu .

<http://dw-sql-reports/Reports> (from campus computers only)

Section Planning Data: Also backed by our SQL data warehouse, this report has been made available via an Excel pivot table to support enrollment management decisions. This report contains information on enrollments, caps, waitlists, and full time equivalent students (FTES) and includes a visual indicator of low enrolled classes. These reports contain sensitive data and are only available to authorized users from on campus computers in the staff domain.

For access information, contact: Terrence Willett, terrence@cabrillo.edu .

California Partnership for Achieving Student Success: Reports tracking students from K-12 into postsecondary education.

<https://www.calpassplus.org/>

California Department of Education Data Quest: K-12 enrollments, demographics, graduates, test scores, and more.

<http://data1.cde.ca.gov/dataquest/>

California State University, Office of the Chancellor and Analytic Studies:

Enrollments, demographics, graduates, reports, test score reports, downloadable data files and more.
